

# Bill: An Act To Extend The Period Allowed To The Montreal Telegraph Company For Extending Their Line

Ra-Transp. & Com. LeBourdais: Ontario Northland Rwy -5-

agricultural possibilities. The railway here was also adjacent to the mining regions of Kirkland Lake and Porcupine. The former required a branch (acquired by purchase) five miles eastward from Swastika, a station on the main line; while the latter required a branch 31 miles westward from Porquis Junction. In these two mining communities the combined population now amounts to about 40,000, and the needs of so many people, aside from anything else, would justify the building of a railway. Seven miles east of Porquis Junction is the company town of Iroquois Falls, where the Abitibi Power and Paper Company Limited has its great paper mill with a daily capacity of 500 tons of wrapping newsprint and 30 tons of wrapping paper.

In 1922, the decision was reached to extend the railway from Cochrane to the Abitibi Canon, where the Abitibi Power and Paper Company Limited was planning the development of 275,000 horse power of hydro-electric energy, at the point where the Abitibi River, on its way to James Bay, drops over the Pre-Cambrian escarpment to the level of the coastal plain extending from there to the bay.

Construction north of Cochrane was undertaken in two sections; from Cochrane to Island Falls to Fraserdale (Abitibi Canon), begun in 1927 and completed the following year. These two sections continued largely in the Clay Belt, which extends for 70 miles north of Cochrane; furthermore, the area is highly mineralized; and also possesses extensive stands of excellent timber, both merchantable and pulp. It is not yet very well settled, and no mines have been located; but it is generally believed that the country will in time amply justify the extension of the railway to this point. North of here, the formation changes from the Pre-Cambrian plateau with an average level of 500 feet, to the Palaeozoic lowlands, making a drop of 500 feet in about ten miles. It is here that the Abitibi Power and Paper Co. Ltd. has built its dam. (Before the project was completed,

On proposing to extend this line to Bristol much opposition was offered by the directors, In the Electric Telegraph Company commenced its operations with a there has grown up across the Atlantic the greatest news-gathering agency ..
