Human embryogenesis is the process of cell division and cellular differentiation of the embryo that occurs during the early stages of development. In biological terms, human development entails growth from a one-celled . The embryoblast forms an embryonic disc, which is a bilaminar disc of two layers, an upper layer. A prototype two- and three-dimensional color atlas of mouse development is described. For the 3D atlas, gray scale images digitized from the mutant embryo were mouse genome: a personal database for gene mapping and molecular biology D.A. Stephenson, M. Mercola, E. Anderson, C.
