

Setting Limits: Medical Goals In An Aging Society

DANIEL CALLAHAN

"Callahan addresses the problems of aging in a clear, comprehensive, sensitive, and compassionate manner. This is a pivotal work that poses hard questions and proposes provocative answers. *Setting Limits* promises to be the benchmark for future moral, medical and policy discussions of aging."

—Earl E. Shelp, *The New York Times Book Review*

"A thought-provoking and heart-jarring assessment of medical goals and aging in the United States today."

—Marylee Wilson, *America*

"Instead of talking as if we can do everything for everyone, Callahan's book has the merit of focusing debate on a different set of priorities for the health care system right now. . . . indispensable reading for those who want to think seriously about the ethical challenge of an aging society."

—Harry R. Moody, *Medical Humanities Review*

"Thoughtfully crafted and often troubling . . . engaging, pivotal."

—Gilbert M. Gaul, *The Philadelphia Enquirer*

"Callahan's book should be read—but very carefully—by anyone interested in aging, older persons, health care, and issues of morality in American society. . . . This book is likely to be a point of reference in such discussions for some time to come."

—Robert H. Binstock and Jeff Kahana, *The Gerontologist*

"Provocative, well-based arguments from a respected voice."

—*Kirkus Reviews*
